MEYER MAGAZINE

ENLIGHTENING
FIT-OUT AND
PARTITIONING

SPACE MAKERS

Art Deco with a contemporary twist, 13 Hanover Square holds true to an established elegance befitting its W1 postcode. Luxurious furniture and handmade wooden bookcases bring to mind a Mayfair townhouse or London's famous five star hotels, and Meyer's renovation brought a formerly out of love building, thoroughly into the modern age. A strong sense of brightness and color is sustained through well-designed light flow and highlighted with our choice of opulent Flos lighting. This striking space is full of burnished bronze, gold fixtures and alabaster surfaces, comforting and authoritative, it is one of our most notable transformations to date.

"FIT OUT IS ABOUT ATMOSPHERE,
MOOD AND ETHOS NOT JUST
AESTHETICS."

MISSION PARTITION

Hoyez Glass Partitioning has become a staple of modern office design. Allowing natural light flow from floor to ceiling throughout an entire floor, through intelligent design we can transform dark and claustrophobic buildings into bright, airy and inspiringly modern spaces. Recently, Meyer have completed an exceptional build for Heineken's offices in (insert location here). The sharp angles and colorful graphic layovers revitalise and compliment the original industrial aesthetic, along with playful usage of neon backlighting, creating a clear, fun and modern atmosphere. Creative use of glass frosting has been applied to meeting spaces, satisfying their need for both privacy and interesting design.

HOYEZ GLASS PARTITIONING IS
SUSTAINABLE, EFFICIENT AND
AESTHETICALLY VERY PLEASING.

DESIGN.
DEVELOP.
DELIVER.
